EDUCATION

Texas Christian University Expected May 2027
B.S., Computer Information Technology Fort Worth, TX
Relevant Coursework: Software Engineering, Data Structures, Database Systems, Cloud Computing, Machine Learning

EXPERIENCE

Backend AI Engineer Jul 2026 – Present
FlyRank Remote

- Developed Python backend and data workflows to process, validate, and integrate structured data across production applications.
- Built automated evaluation and testing workflows to measure system correctness, data quality, and application reliability.
- Implemented validation, monitoring, retries, and failure handling to improve reliability across integrated production systems.
- Analyzed failures through systematic debugging and documented technical solutions to support maintainability and continuous improvement.

Forward Deployed Engineer Jun 2026 – Aug 2026
CompuMatrice Inc. Remote

- Built Python ELT workflows integrating APIs, databases, retrieval systems, and enterprise data sources for downstream applications.
- Developed automated data workflows with transformation, validation, and testing to improve data quality and processing reliability.
- Built REST API integrations to extract, process, and exchange data across enterprise systems and automated workflows.
- Partnered with customers and engineers to translate business requirements into technical solutions and troubleshoot production issues.

Machine Learning Fellow Aug 2025 – Dec 2025
Meta Remote

- Analyzed large datasets in Python using statistical methods to identify patterns, anomalies, and model performance trends.
- Designed reproducible ML experiments for model evaluation, benchmarking, and identification of optimization opportunities.
- Built Python and Jupyter workflows for data processing, experimentation, and quantitative analysis across large datasets.
- Communicated analytical findings, methodologies, and data-driven recommendations to technical and non-technical stakeholders.

IT Support Assistant Dec 2023 – Present
Texas Christian University Fort Worth, TX

- Provided frontline IT support for 500+ users, resolving hardware, software, connectivity, account access, and enterprise application issues.
- Troubleshot Windows and macOS systems, Microsoft applications, network connectivity, and user access through in-person and remote support.
- Managed support tickets, documented troubleshooting steps and resolutions, and escalated complex issues to appropriate technical teams.
- Maintained a 4.77/5 customer satisfaction rating while supporting users in a fast-paced, service-focused environment.

PROJECTS

TaskBuddy Agent
Built a multi-step AI agent integrating Canvas, Google Drive, Google Calendar, and Gmail APIs to retrieve data and execute automated workflows.

Semantic Book Recommender
Cleaned and processed a 7,000-book dataset; built an embedding-based recommendation model using semantic similarity.

Demographic Bias Detector
Evaluated BERT and RoBERTa models across 28,000+ text records to analyze demographic bias and reliability.

AI MLB Analytics Agent
Built an AI analytics workflow automating feature engineering, predictive modeling, analysis, and generation of data-driven insights.

Data Deletion Audit Agent
Built a Python AI audit pipeline to validate 518 data-deletion requests, resolve historical identities, and detect residual PII across distributed systems.

SKILLS

- **Programming & Data:** Python, SQL, Pandas, NumPy, ETL/ELT, Data Pipelines, Data Integration, REST APIs, Data Validation, Data Quality, PII Detection, REST APIs, Google Workspace APIs (Gmail, Calendar, Drive)
- **AI & Machine Learning:** AI Agent Development, LLM Integration, Retrieval-Augmented Generation (RAG), Embeddings & Semantic Search, Transformer Models (BERT, RoBERTa), Predictive Modeling, Feature Engineering, Statistical Analysis, Model Evaluation, Bias & Fairness Evaluation, Scikit-learn
- **Business Intelligence & Visualization:** Power BI, Tableau, Excel, Data Visualization, Dashboard Development, Reporting
- **Databases & Cloud:** BigQuery, BigQuery ML, Google Cloud Platform (GCP), MongoDB, Firebase, Relational Databases
- **Engineering & Tools:** Git, Docker, Linux/Unix, CI/CD, Automated Testing, Debugging, Jupyter, Technical Documentation
- **IT & Support:** Windows, macOS, Microsoft 365, Network Troubleshooting, Account Administration, Ticketing, Customer Support

EXTRACURRICULAR

Treasurer, TCU Computer Science Society (Fort Worth, TX) Feb 2025 – May 2026
AI/ML Fellow, Break Through Tech AI (Remote) May 2025 – May 2026
